

Dear Parent or Guardian,

We are committed to provide a technology rich environment for our students as our community believes the use of Information Communication Technology (ICT) is fundamental to assist teaching and learning in all areas of the school curriculum.

The volume and quality of web-based learning resources and cloud-based storage has risen steadily over the last decade and these are increasingly being used by teachers across the Territory to improve student learning outcomes.

Sometimes it is beneficial for students to access services by third party web-based providers. Types of services include online content creation, collaborative tools, online educational software and various administrative programs to track student assessment.

These platforms can constitute a major part of the teaching and learning programs including assessment.

Our school wishes to register with a number of web-based service providers that may require information like full name, year level, email address or birthday. Under current legislation we are required to advise you of the reasons for collecting the information, what will be done with it and who else may have access to it. Please rest assured that our efforts are to respect the privacy of individuals at all times. Attached are the platforms we seek your approval for.

The Education and Training Directorate has also released a new Communities Online Policy. This document provides further information on the use of technology resources in schools in the present climate of new and improved digital accessibility.

http://www.det.act.gov.au/publications_and_policies/policy_a-z

Please indicate your consent or non-consent for the services listed by ticking the appropriate option, signing this form and have your child return it to their teacher or the front office to be placed on your child's file.

Third Party Web Based Providers

Name of Provider: Google Apps for Education (GAPE)

Type of Service: Google has a suite of applications available to educational institutions for use in school communities. The applications that are provided are email, classroom, calendar, drive, documents (docs), slides, spread sheets, sites, and forms. A range of other applications (apps) are available to load onto the user's account. It allows staff and students to create, share and collaborate in an online space where the school can monitor usage.
